By the glass from the Enomatic

Enomatic was born in 2002 from the happy intuition of two Tuscan entrepreneurs, who - after years of experimentation and market analysis - decided to industrialize an innovative system for preserving and serving wine by the glass, allowing countless benefits to all its users.

Enomatic dispensers allow the wine to be drawn directly from the bottle to the glass through a gas system (inert gas that prevents normal wine alterations due to oxidation). The wine retains its characteristics for more than three weeks after opening the bottle, as if it had just been opened.
